Contents

Contributors	xxxi
About the editors.....	xli
Preface	xliii

PART 1 Introduction

CHAPTER 1.1 Evolution of antioxidants over times (including current global market and trend)..... 3

Noyel Ghosh, Sharmistha Chatterjee, Parames C. Sil	
Introduction.....	3
Oxidative damage and antioxidants	5
Antioxidants in early human use.....	7
Types of antioxidants and their mode of action	8
Enzymatic antioxidants	8
Nonenzymatic antioxidants.....	10
Other natural antioxidants.....	16
Current research focus and trends	17
Current global market	18
Economic burden and cost benefit of antioxidants.....	21
Adverse effect of antioxidants	22
Conclusion	25
Conflict of interest	26
Abbreviations.....	26
References.....	27

CHAPTER 1.2 The oxidative stress: Causes, free radicals, targets, mechanisms, affected organs, effects, indicators 33

Amit Kumar Singh, Harvesh Kumar Rana, Abhay K. Pandey	
Introduction.....	33
Oxidative stress	34
Free radicals and their sources	34
Targets of free radicals.....	35
Free radicals and their damaging effect on organs	36
Biomarkers.....	37
Conclusion	38
Acknowledgments	39
References.....	39

CHAPTER 1.3 Food auto-oxidation: An overview 43

Aakriti Garg, Ruchika Sharma, Prasanta Dey, Anoop Kumar

Introduction.....	43
Mechanism of auto-oxidation	44
Initiation	44
Propagation	46
Termination	46
Methods for the determination of food auto-oxidation	46
Determination of primary products	47
Determination of secondary products	49
Determination of oxygen absorption.....	51
Factors influencing auto-oxidation	51
Toxic effects of food auto-oxidation.....	52
Prevention of food auto-oxidation	54
Antioxidants used in the food industry	54
Effect of antioxidants on human health	56
Ascorbic acid	56
Butylated hydroxyanisole and butylated hydroxytoluene	56
Gallates	57
Tocopherols	57
Tertiary butylhydroquinone	57
Regulatory guidelines/aspects.....	58
Current challenges	58
Conclusion.....	60
Acknowledgments	60
Abbreviations	60
References	61

PART 2 Endogenous antioxidants**CHAPTER 2.1 Bilirubin 71**

Mohamad Fawzi Mahomoodally, Jankee T. Laxmi

Origin and structure	71
Bilirubin synthesis	71
Bilirubin metabolism and excretion	72
Bilirubin as an antioxidant	72
Bilirubin and its potential detrimental effects	72
Conclusion.....	78
References	78

CHAPTER 2.2 Catalase 81

Mohamad Fawzi Mahomoodally, Daphne Désiré A.-L.,
Elodie Rosette M. A.-L.

Introduction.....	81
Endogenous and exogenous sources	82
Catalase: Importance, benefits, and activity.....	82
Catalase therapy in diabetic retinopathy	83
Catalase therapy in cancer treatment.....	83
Catalase therapy in cardiac patients	83
Impact of physiological, behavioral and environmental factors on catalase activity	83
Role of catalase as a biomarker for oxidative stress	84
Mechanism of action of catalase	84
In vitro and in vivo studies.....	85
Clinical Study	86
Conclusion	87
References.....	88

CHAPTER 2.3 Coenzyme Q: An endogenous antioxidant 91

Rajeshwar K.K. Arya, Prashant Kumar, Anita Singh,
Mahendra Rana, Amita J. Rana, Aadesh Kumar

Introduction.....	91
Mechanism of action of coenzyme Q10.....	93
Coenzyme Q10 as pro-oxidant.....	94
Beneficial effects	94
Can endogenous antioxidants be detrimental for human health; in what extant?.....	94
Beneficial effect of CoQ10 as evidenced by clinical studies.....	95
<i>In-vitro</i> and <i>in-vivo</i> studies	97
Conclusion	99
Conflict of interest	99
Abbreviations.....	99
References.....	99

CHAPTER 2.4 Ferritin 105

Mohamad Fawzi Mahomoodally , Joomun B. Fatimah-Tuz-Zohra

Introduction.....	105
Serum ferritin level as a diagnostic biomarker.....	106
Role of ferritin in Fe homeostasis	109
Ferritin and oxidative stress	109
Conclusion	111
References.....	111

CHAPTER 2.5 Glucose-6-phosphate-dehydrogenase.....115

Mohamad Fawzi Mahomoodally, Chundoo B. Azeemah

Introduction.....	115
Mechanism of action.....	115
Beneficial effects of glucose-6-phosphate on health.....	117
Detrimental effects of glucose-6-phosphate on health.....	119
Drug induced hemolysis	121
Conclusion.....	123
References	123

CHAPTER 2.6 Melatonin.....127

Mohammad Hossein Asghari, Milad Moloudizargari

Endogenous sources.....	127
Mechanisms of action	128
Beneficial effects of melatonin on health.....	129
Melatonin as an antioxidant	129
Direct reactive oxygen species scavenging	130
Effects of melatonin on diseases	131
Clinical studies	132
Melatonin and cancer.....	133
Conclusion/future prospects	134
References	135

CHAPTER 2.7 Superoxide dismutase139

Arnab Karmakar, Abhishek K. Das, Noyel Ghosh,
Parames C. Sil

Introduction.....	139
Classifications of different types of superoxide dismutase	141
General classification of superoxide dismutase	141
Classification of mammalian superoxide dismutase	142
Mechanism of action.....	143
Beneficial roles of superoxide dismutases	145
Superoxide dismutases and diseases	147
Superoxide dismutase as a therapeutic target against various diseases	149
Superoxide dismutases and cancer.....	149
Superoxide dismutase and diabetes.....	151
Superoxide dismutase in bronchopulmonary dysplasia.....	151
Superoxide dismutase in cystic fibrosis	152
Superoxide dismutase in rheumatoid arthritis and osteoarthritis	152

Superoxide dismutase in ischemia-reperfusion injury ...	152
Superoxide dismutase and neurological disorders	153
Superoxide dismutase in gastrointestinal disorders	154
Superoxide dismutase in inflammatory disorders	154
Adverse effects of superoxide dismutase	155
Optimum dose, route of administration, and limitations of therapeutic use of superoxide dismutase	157
Conclusion	157
Abbreviations	158
References	159
CHAPTER 2.8 Uric acid	167
Mohamad Fawzi Mahomoodally, Daphne Désiré A. -L., Sanaa Dilmar A., Elodie Rosette M. A. -L.	
Introduction	167
Antioxidant effect of uric acid	168
Pro-oxidant activity of uric acid	168
Beneficial effects of uric acid	169
Antioxidant properties	169
Endothelial functions	169
Booster of type 2 immune responses	169
Defence against neurological and autoimmune diseases	170
Increasing the bioavailability of uric acid	170
Hydroxytyrosol	170
Lemons	171
<i>Barringtonia racemosa</i> L.	171
Detrimental effects of uric acid	171
Life expectancy in breast cancer patients	171
Eclampsia	172
Gout 172	
Behavioral and mental disorders	173
Conclusion	173
References	174
PART 3 Synthetic antioxidants: bright and the dark side	
CHAPTER 3.1 Ascorbyl palmitate	179
Renald Blundell, Muhammad Ajmal Shah, Joseph I. Azzopardi, Amira Y. Benmelouka, Mohammed Alqarni, Haroon Khan	
Chemistry	179
Synthesis	179
Legal status	180

Mechanism of action	183
Effects on health	183
Conclusions	184
Authors' contribution	184
References	185
CHAPTER 3.2 Butylated hydroxyanisole	189
Renald Blundell, Muhammad Ajmal Shah, Joseph I. Azzopardi, Amira Y. Benmelouka, Azhar Rasul, Norah A. Althobaiti	
Chemistry	189
Synthesis	189
Legal status	190
Mechanisms of action	190
Effects on health	191
Conclusions	192
Authors' contribution	192
References	192
CHAPTER 3.3 Butylated hydroxytoluene	195
Renald Blundell, Muhammad Ajmal Shah, Joseph I. Azzopardi, Shabnoor Iqbal, Akhtar Rasul, Ghulam Mujtaba Shah	
Chemistry	195
Synthesis	195
Legal status	196
Mechanisms of action	197
Effects on health	198
Conclusions	198
Authors' contribution	198
References	199
CHAPTER 3.4 Erythorbic acid (D-ascorbic acid)	201
Renald Blundell, Muhammad Ajmal Shah, Joseph I. Azzopardi, Shabnoor Iqbal, Tapan Behl, Abdul H. Khan	
Chemistry	201
Synthesis	201
Legal status	202
Mechanisms of action	202
Effects on health	203
Conclusions	204
Authors' contribution	205
References	205

CHAPTER 3.5 Nordihydroguaiaretic acid.....207

Renald Blundell, Muhammad Ajmal Shah, Joseph I.

Azzopardi, Shabnoor Iqbal, Akhtar Rasul, Zunera Chauhdary

Chemistry..... 207

Synthesis..... 207

Legal status..... 208

Mechanisms of action..... 208

Effects on health..... 208

Conclusions..... 210

Authors' contribution..... 210

References..... 210

CHAPTER 3.6 Octyl gallate 215

Renald Blundell, Muhammad Ajmal Shah, Joseph I. Azzopardi,

Shabnoor Iqbal, Reem Hasaballah Alhasani, Ghulam Mujtaba

Shah

Chemistry..... 215

Synthesis..... 215

Legal status..... 216

Mechanisms of action..... 217

Effects on health..... 217

Conclusions..... 218

Authors' contribution..... 218

References..... 218

CHAPTER 3.7 Propyl gallate..... 221

Renald Blundell, Muhammad Ajmal Shah, Joseph I.

Azzopardi, Shabnoor Iqbal, Malik Saad Ullah, Shahid Rasool

Chemistry..... 221

Synthesis..... 221

Legal status..... 222

Mechanisms of action..... 223

Effects on health..... 223

Conclusions..... 224

Authors' contribution..... 224

References..... 225

CHAPTER 3.8 Tert-butylhydroquinone227

Renald Blundell, Muhammad Ajmal Shah, Joseph I. Azzopardi,

Zunera Chauhdary, Shahid Shah, Ghulam Mujtaba Shah

Chemistry..... 227

Synthesis..... 227

Legal status..... 228

Mechanisms of action	228
Effects on health	229
Conclusions	232
Authors' contribution	232
References	232

PART 4 Natural occurring antioxidants: bright and the dark side

CHAPTER 4.1 Amino acid: Essential building blocks for Human body..... 237

Dheeraj Bisht, Harikesh Maurya, Tanuj Joshi, Tarun Belwal,
Arasana Dhariwal, Aadesh Kumar

Introduction.....	237
Sources 237	
Chemistry.....	238
Bioavailability.....	238
Mechanisms of action	238
Pro-oxidant activity.....	239
Beneficial and detrimental effects on health	239
<i>In-vitro</i> evidence of amino acids.....	239
Animal studies 242	
Clinical studies.....	242
Effect of antioxidants on the gastrointestinal tract.....	246
Conclusion	246
Abbreviations	247
References	247

CHAPTER 4.2 Carnosine 251

Mohamad Fawzi Mahomoodally, Sanaa Dilmar A.,
S. Khatoon Khadaroo

Introduction.....	251
Sources of carnosine	252
Factors determining carnosine content in muscles.....	252
Synthesis of carnosine.....	254
Bioavailability of carnosine	254
Intestinal transport	254
Carnosine transporters (PEPT 1 and PEPT 2).....	255
Carnosinase activity	255
Mechanism of action.....	256
Possible pro-oxidant activity.....	258
Beneficial effects of carnosine on health	258
Carnosine in diabetes and associated complications	258

Combating and preventing neurological issues	259
Carnosine against cancer and side effects	260
Carnosine and its effect on aging	261
Application of carnosine	261
Ergogenic aid in sports	261
Studies demonstrating antioxidative properties of carnosine ...	264
Detrimental effects of carnosine on health	264
Conclusion	265
References.....	265
CHAPTER 4.3 Carnosol	269
Xiuping Chen	
Introduction.....	269
Source and chemistry.....	269
Bioavailability and toxicity.....	271
Antioxidant and pro-oxidant activities.....	272
Pharmacological effects and underlying mechanisms.....	272
Anticancer.....	272
Neuroprotective	273
Clinical studies.....	273
Conclusion	274
Acknowledgments	274
Abbreviations.....	274
References.....	275
CHAPTER 4.4 Carotenoids (Xanthophylls and Carotenes)	279
Koula Doukani, Ammar S.M. Selles, Hasna Bouhenni, Meriem Chafaa, Leila Soudani	
Carotenoids	279
Chemical composition	279
Sources of carotenoids	281
Carotenes	282
Xanthophylls.....	282
Carotenoids accumulation and bioavailability	283
Beneficial and detrimental effects of carotenoids on health.....	285
Beneficial effects	285
Detrimental effects.....	292
Toxicity of carotenoids	292
<i>In-vitro</i> evidence, animal studies, and clinical studies of carotenoids	294
Conclusion	297
Abbreviations.....	297
References.....	298

CHAPTER 4.5 Citric acid, antioxidant effects in health 309

Sushil Kumar Singh, Rahul Kaldate, Arti Bisht

Introduction.....	309
Chemistry.....	310
Bioavailability.....	311
Mechanisms of action	311
Possible prooxidant activity	312
Safety profile or toxicity studies	312
Beneficial and detrimental effects on health	313
Animal studies and clinical studies	314
Conclusion.....	318
References	318

CHAPTER 4.6 Antioxidant activity of coenzyme-Q; bright and dark side..... 323

Ziyad Khan, Haroon Khan, Marya, Muhammad Ajmal Shah

Introduction.....	323
Origin and sources of coenzyme-Q10.....	323
Chemistry 323	
Recommended oral dose and bioavailability	324
Antioxidant mechanisms of action.....	325
Possible Pro-oxidant activity	327
Beneficial and detrimental effects on health	327
<i>In vitro</i> antioxidant evidence.....	329
Animal studies	329
Clinical studies.....	329
Side effects.....	329
Safety profile.....	334
Conclusion.....	334
Abbreviations	334
References	335

CHAPTER 4.7 Curcumin..... 341

Hari P. Devkota, Anjana Adhikari-Devkota, Dhaka R. Bhandari

Introduction.....	341
Antioxidant activities of curcumin.....	343
In-vitro studies 343	
In-vivo (animal) studies	345
Clinical studies 345	
Bioavailability of curcumin	346
The pro-oxidant activity of curcumin	347

Beneficial and detrimental effects of curcumin in human health.....	347
Conclusions.....	348
References.....	348
CHAPTER 4.8 Flavonoids.....	353
Lingchao Miao, Haolin Zhang, Li Yang, Lei Chen, Yixi Xie, Jianbo Xiao	
Introduction.....	353
Chemistry.....	353
Physical and chemical properties.....	355
Bioavailability.....	356
Absorption and metabolism of flavonoids in gastrointestinal tract and liver	356
Phase I metabolism of flavonoids	356
Phase II metabolism of flavonoids	356
ATP-dependent efflux transporter.....	357
Stability.....	357
Antioxidant activity of flavonoids.....	359
Ortho-polyphenol structure and double bond between C3 and C4	360
Hydroxylation	361
Glycosylation.....	361
Mechanisms of bioactivities in cell levels.....	362
Anti-inflammation activity.....	362
Antioxidant activity	362
Anticancer activity	363
Antidiabetic activity.....	363
Pharmacology in animal studies	364
Anticancer activity	364
Antidiabetic activity.....	365
Anti-inflammation activity.....	366
Antiobesity activity.....	367
Clinical studies.....	367
Future perspectives	368
References.....	369
CHAPTER 4.9 Lecithin	375
Shahira M. Ezzat, Mohamed A. Salem, Nihal M. El Mahdy, Marwa M. Mahfouz	
Introduction.....	375
Sources of lecithin	376

Chemistry of lecithin	376
Beneficial and detrimental effects on health.....	376
Benefits for the cells	377
Benefits for the liver	377
Cardiovascular benefits.....	378
Benefits for the GIT	378
Benefits for memory	378
Other health benefits	378
The pro-oxidant activity	378
<i>In-vitro</i> studies	379
Animal studies	380
Mechanism of action	380
Clinical trials	380
Bioavailability	382
Conclusion.....	382
References	383
CHAPTER 4.10 Lignans	387
Juan M. Álvarez-Caballero, Ericsson Coy-Barrera	
Background.....	387
Sources of lignans	388
Chemistry 389	
(Neo)lignans classification: A summary	390
Biosynthesis of lignans: An overview	392
Bioavailability.....	394
Lignans intake 394	
Lignan metabolism 395	
Antioxidant activity of (neo)lignans	
and mechanism of action	397
Sesamoline and sesamol	398
Argenteane 399	
Enterolignans and precursors	
(SDG-SECO-END-ENL).....	399
Other (neo)lignans 400	
Plausible pro-oxidant activity of lignans.....	400
Beneficial effects of lignans on health	403
<i>In-vitro</i> evidences of antioxidant activity of (neo)lignans.....	404
Animal and clinical studies	405
Concluding remarks	406
Acknowledgments	407
References	407

CHAPTER 4.11 Organosulfur compounds (allyl sulfide, indoles)...417

Mohamad Fawzi Mahomoodally, Nouzaifa Nabee,
Baureek Nawshin

Introduction.....	417
Sources, chemical structure, and bioavailability of organosulfur compounds.....	418
Mechanisms of action	418
Allyl sulfides.....	418
Indoles 420	
Indole-3-carbinol	420
Isothiocyanates.....	420
Beneficial and detrimental effects on health	421
Beneficial effects	421
Detrimental effects.....	422
In vitro evidences.....	422
Animal studies	423
Clinical studies.....	423
Conclusion	424
References.....	424

CHAPTER 4.12 Phenolic acids.....427

Hari P. Devkota, Anjana Adhikari-Devkota

Introduction.....	427
Antioxidant activity of phenolic acids	429
Pro-oxidant activity of phenolic acids.....	430
Bioavailability and metabolism of phenolic acids	431
Conclusions.....	432
References.....	432

CHAPTER 4.13 Phytic acid: As a natural antioxidant.....437

Jyoti Upadhyay, Nidhi Tiwari, Sumit Durgapal,
Arvind Jantwal, Aadesh Kumar

Introduction.....	437
Sources of phytic acid	438
Mechanism of action of phytic acid as an antioxidant	438
Possible pro-oxidant activity.....	439
Role of phytic acid as antioxidant in health and disease	440
Diabetes mellitus (DM).....	440
Nephrolithiasis (Calculi).....	440
Cardiovascular diseases (CHD)	441

Dental caries	441
Cancer	441
<i>In-vivo</i> studies	442
Anticarcinogenic effect.....	442
Alzheimer's disease.....	442
Parkinson's disease.....	442
Diabetes mellitus	443
Hypolipidemia	443
<i>In-vitro</i> studies	443
Conclusion.....	445
References	445
CHAPTER 4.14 Protein hydrolysates	451
Mohamad Fawzi Mahomoodally, Meeajan M. Irfaan	
Introduction.....	451
Sources, chemistry, and bioavailability	451
Mechanism of protein hydrolysates as antioxidants	452
Degree of hydrolysis on protein hydrolysates activity	453
Therapeutic action of protein hydrolysates	454
In vitro test for the appraisal of antioxidant potential	
of protein hydrolysates.....	455
An appraisal of protein hydrolysates activity in vivo.....	456
An appraisal of protein hydrolysates activity in human trial	457
Safety, regulation, and application.....	457
Conclusion.....	458
References	458
CHAPTER 4.15 Selenium	461
Tanuj Joshi, Sumit Durgapal, Vijay Juyal, Arvind Jantwal, Mahendra Rana, Aadesh Kumara	
Introduction.....	461
Selenium and its role as an antioxidant	462
Evidence of beneficial effects of selenium from <i>in-vitro</i>	
and preclinical studies.....	463
Evidence of beneficial effect of selenium from	
clinical studies	465
Dark side of selenium: Adverse and toxic effects	469
Conclusion.....	471
References	472

CHAPTER 4.16 Sterols: beneficial or detrimental for human helath.....	475
Tanuj Joshi, Kiran Patni, Tarun Belwal, Harikesh Maurya, Aadesh Kumar	
Sterols and their role as antioxidants	475
Bright side of sterols	477
Beneficial effect of sterols as evidenced by <i>in vitro</i> and animals studies	477
Beneficial effect of phytosterols as evidenced by clinical studies.....	479
Dark side of sterols: Adverse effects and toxicity	480
Conclusion	482
References.....	482
CHAPTER 4.17 Tartaric acid	485
Arvind Jantwal, Sumit Durgapal, Jyoti Upadhyay, Tanuj Joshi, Aadesh Kumar	
Introduction.....	485
Classification of natural antioxidants	485
Source of tartaric acid	487
Pharmacological activity of tartaric acid.....	489
Toxicity studies of tartaric acid.....	489
Conclusion	490
References.....	490
CHAPTER 4.18 Turmeric	493
Filippo Maggi	
Introduction.....	493
Etymology.....	493
Systematics	494
Distribution	494
Botanical description	495
Turmeric preparations	495
Uses as dye.....	495
Ethnobotany	496
Turmeric metabolites	496
Nutraceutical and medicinal uses.....	498
Uses as antioxidant	499
Conclusions.....	501
References.....	501

CHAPTER 4.19 Uric acid..... 505Sumit Durgapal, Arvind Jantwal, Jyoti Upadhyay,
Tanuj Joshi, Aadesh Kumar

Introduction.....	505
Uric acid as an antioxidant.....	506
Risk factors associated with the high concentration of uric acid	509
Gout 509	
Cardiovascular disease.....	510
Renal disorder 510	
Experimental studies conducted to elucidate the risk of uric acid	511
Conclusion.....	513
References	514

CHAPTER 4.20 Vanillin 517

Gökçe Ş. Karatoprak

Introduction.....	517
<i>In-vitro</i> antioxidant activity of vanillin.....	518
<i>In-vivo</i> antioxidant activity of vanillin	519
Prooxidant activity of vanillin.....	520
Vanillin formulations and their antioxidant activities	521
Evaluation of vanillin in terms of human health	521
Acute and repeated dose toxicity	522
Bioavailability.....	522
Clinical trials.....	522
Conclusion.....	523
References	523

CHAPTER 4.21 Vitamin A..... 527

Ömer F. Yakıncı, Ipek Süntar

Introduction.....	527
Vitamin A: Its functions and chemistry	528
Antioxidant effect of vitamin A	530
Conclusion.....	532
References	532

CHAPTER 4.22 Vitamin C..... 535

Manish Kumar, Vinay Pratap, Jalaj K. Gour, Manoj K. Singh

Introduction.....	535
History 536	
Sources and daily allowance of vitamin C	536

Chemical structure and biochemistry of vitamin C	536
Biosynthesis of vitamin C in the plants and animals.....	538
Beneficial effects of vitamin C on health.....	539
Anticancer activity of ascorbic acid	539
Antioxidant activity of vitamin C.....	540
Detrimental effects of ascorbic acid on health	541
Pro-oxidant activity of ascorbic acid.....	543
Conclusion	543
References.....	544

CHAPTER 4.23 Vitamin E (tocopherols and tocotrienols) (natural-occurring antioxidant; bright and dark side) 547

Ziyad Khan, Salman Ahmed, Marya, Hammad Ullah,
Haroon Khan

Introduction.....	547
Sources.....	548
Chemistry.....	549
Absorption and metabolism	549
Bioavailability.....	551
Mechanism of action.....	552
Possible pro-oxidant activity.....	553
Beneficial effects of vitamin E on health	553
Side effects/unwanted of vitamin E	555
In-vitro and in-vivo studies on vitamin E	556
Clinical trial studies	556
Conclusions.....	557
References.....	558

CHAPTER 4.24 Vitamin K 561

Abhishek K. Das, Sumit Ghosh, Parames C. Sil

Introduction.....	561
General informations about vitamin K.....	561
Types of vitamin K and structures	561
Dietary sources of vitamin K	563
Bioavailability.....	565
Some important information at a glance	565
Cellular metabolism of vitamin K.....	565
Absorption of vitamin K	565
Storage of vitamin K.....	566
Redox cycling of vitamin K	566
Vitamin K dependent proteins and their functions.....	568

Vitamin K dependent protein carboxylation	568
The basic structure of a VKD protein	568
Blood coagulation and vitamin K	570
Bone mineralization	573
Other VKD proteins	573
Reported <i>in vivo</i> , <i>in vitro</i> , and clinical effect of vitamin K in the mammalian system.....	574
Vitamin K and cardiovascular system	574
Vitamin K and diabetes.....	574
Oxidative stress and vitamin K.....	574
Vitamin K toxicity, catabolism and excretion in mammals.....	575
Vitamin K deficiency in mammals	575
Vitamin K antagonist	576
Conclusion.....	577
References	577
CHAPTER 4.25 Zinc.....	583
Toorabally B. Zaynab, Subratty A. Hussein, Mohamad Fawzi Mahomoodally	
Sources	583
Chemistry	583
Bioavailability of zinc	584
Zinc as an antioxidant	585
Beneficial and detrimental effects on health	586
Zinc supplementation in humans	587
<i>In-vitro</i> studies in human cells	588
Animal studies and clinical studies	589
Conclusion.....	589
References	590
 PART 5 Antioxidants and diseases: beneficial and detrimental effects	
CHAPTER 5.1 Beneficial and detrimental effects of antioxidants in cancer.....	595
Saeideh Momtaz, Shokoufeh Hassani, Amir Hossein Abdolghaffari	
Introduction.....	595
Antioxidants in cancer development and treatment	595
Antioxidant foods and cancer prevention	596

Antioxidants; clinical trials in cancer prevention and treatment.....	597
Common dietary antioxidants in cancer prevention.....	598
Tea polyphenols and catechin	598
Curcumin.....	599
Resveratrol	600
Quercetin.....	600
Flavonoids.....	601
Other promising dietary antioxidants	602
Antioxidants for cancer management; cure or threat	603
Antioxidants in combination therapy in combating cancer.....	604
Conclusion	604
References.....	605

CHAPTER 5.2 Antioxidants and cardiovascular diseases613

Ankita Mandal, Uday Hossain, Parames C. Sil	
Introduction.....	613
Oxidative stress and its role in cardiovascular disease: a brief idea.....	614
Antioxidants and cardiovascular diseases	616
Vitamins and CVD.....	618
Vitamin E.....	618
Vitamin C.....	619
α -Carotene and vitamin A	621
Polyphenols.....	622
Anthocyanins	622
Catechins.....	624
Resveratrol	626
Conclusion	629
Abbreviations.....	630
References.....	630

CHAPTER 5.3 Antioxidants and cataracts/age-related macular degeneration641

Laxman Singh, Pooja Patni, Archana N. Sah, Devesh Tewari	
Introduction.....	641
Cataract, a global problem	643
Pathophysiology of cataract.....	643
Role of antioxidants in cataract.....	648
Conclusion	648
Abbreviations.....	648
References.....	649

CHAPTER 5.4 Antioxidants and cognitive decline in elderly651

Lobine Devina, Mohamad Fawzi Mahomoodally

Introduction.....	651
Oxidative stress and brain aging	652
Effects of antioxidants on cognitive decline	653
Vitamins and carotenoids.....	653
Selenium 657	
Polyphenolics from berries	657
Polyphenolics from concord grape juice.....	657
Polyunsaturated fatty acids from walnuts	658
Ginkgo biloba 658	
Curcumin 659	
Conclusion.....	660
Abbreviations:	660
References	660

CHAPTER 5.5 Antioxidant and dentistry669Govind Rajpal, Lokesh Patni, Arasana Dhariwal,
Ankit Kumar, Sandeep Visvarma, Aadesh Kumar

Introduction.....	669
Enzymes as antioxidant.....	670
Antioxidants and dental caries (antioxidants have a more preventive than a curative effect on following oral problems).....	671
Periodontology.....	672
Clinical studies.....	673
Restorative dentistry	673
Orthodontics 673	
Oral–maxillofacial surgery	674
Oral cancer 674	
Oral submucous fibrosis.....	675
Repeal of oral leukoplakia with antioxidants	676
Conclusion.....	677
References	677

CHAPTER 5.6 Antioxidants and gastric lesions681Mirele da Silveira Vasconcelos, Tamiris de Fátima
Goebel de Souza, Diana Céla Sousa Nunes-Pinheiro,
Francisco Rogênio da Silva Mendes, Felipe Domingos
de Sousa, Luciana de Siqueira Oliveira, Paulo Carvalho de
Paula, Daniel Cordeiro Gurgel, Ana Sanches Silva, Seyed
Mohammad Nabavi, Dirce Fernandes de Melo

Introduction.....	681
Antioxidant systems.....	682

Gastric lesions.....	684
Gastroprotective potential of natural antioxidants: in vitro, in vivo, and clinical studies.....	690
In vitro	690
In vivo (preclinical).....	690
Clinical studies on phytochemicals and their effect on gastric lesions.....	696
Gastroprotective potential from herbs and medicinal plants....	696
Antioxidants in gastric cancer.....	702
Conclusion	704
References.....	706
CHAPTER 5.7 Antioxidants and immune functions	719
Kasturi Sarkar, Parames C. Sil	
Introduction.....	719
Origin and role of ROS	719
Beneficial roles of reactive species	719
Generation of ROS/RNS in our immune system and their effect on foreign molecules.....	719
Diseases associated with ROS	720
Sources of ROS.....	720
Oxidative stress and endogenous antioxidative systems	722
Enzymes that help in the removal of ROS/RNS	723
Antioxidants that donate electrons to free radicals	723
Proteins that help in minimizing OS	723
Effect of antioxidants on cell-mediated immunity	723
Effect of antioxidant supplements on neutrophils.....	723
Effects of antioxidants on macrophages	725
Effect of antioxidants on dendritic cells.....	726
Effect of antioxidants on T-cells	726
Effect of antioxidants on humoral immunity	727
Effect of antioxidants on hypersensitivity and inflammation...	728
Effect of dietary or supplemented antioxidants on age-related tumor immunity.....	729
Antioxidants shield immune cells from environmental damage.....	729
Effects of exogenous or dietary antioxidants against ROS/RNS generated in an immune response.....	730
Role of antioxidants in combating diseases	730
Role of antioxidants on autoimmunity and oxidative stress.....	731

Possibility of exerting harmful or no effects of antioxidants on immune system	732
Conclusion	734
References.....	734
CHAPTER 5.8 Antioxidants and infertility	741
Harvesh Kumar Rana, Amit Kumar Singh, Abhay K. Pandey	
Introduction.....	741
Infertility	742
Male infertility	743
Female infertility.....	745
Role of oxidative stress in male infertility	745
Role of oxidative stress in female infertility	745
Role of antioxidant in infertility.....	746
Conclusion.....	748
References	749
CHAPTER 5.9 Antioxidants and kidney diseases	755
Roberta Jeane Bezerra Jorge, Aline Diogo Marinho, João Alison de Moraes Silveira, Márcia Maria Vieira Ramos, Jacqueline Ramos Machado Braga, Renata de Sousa Alves, Francisco Assis Nogueira-Junior, Mirele da Silveira Vasconcelos, Ana Sanches Silva, Seyed Mohammad Nabavi, Dirce Fernandes de Melo	
Introduction.....	755
Kidney diseases.....	756
Natural antioxidants and kidney diseases.....	758
Drugs or isolated natural antioxidant potential products in kidney diseases	759
In vitro studies	760
In vivo studies	761
Clinical studies	770
Conclusion.....	785
References	786
CHAPTER 5.10 Antioxidants and liver diseases	799
Jyoti Upadhyay, Nidhi Tiwari, Sumit Durgapal, Mohammad Hosein Farzaei	
Introduction.....	799
Free radicals and oxidative stress.....	800
Free radicals biology.....	801
Oxidative stress in liver caused by free radicals	801
Preventive effect of antioxidants.....	804
Antioxidants in liver diseases	807

Liver: a crucial organ for human body	807
Liver disease and oxidative stress	808
Therapeutic effect of antioxidants in liver diseases ..	809
Flavonoids	809
Phenolic compounds	811
Conclusion	811
References.....	812

PART 6 Actual and future perspectives on antioxidants

CHAPTER 6.1 Antioxidants effects in health: The bright and the dark sides 819

Sajad Fakhri, Mohammad Hosein Farzaei

Introduction.....	819
Oxidative stress: sources and the pathophysiology	820
Antioxidants: sources and related mechanisms.....	821
The interplay of antioxidants and pro-oxidants.....	823
Resilience pathways.....	825
The signaling pathways of antioxidants	826
Antioxidant therapy: novel approaches.....	827
Conclusion	828
References.....	828

CHAPTER 6.2 Food and food supplement antioxidants: Targets in human antioxidant system and effects on the production of endogenous antioxidants837

Anna Blázovics

Briefly about healthy nutrition.....	837
Dietary supplements.....	838
Functional foods	839
Why should antioxidant supplementation be considered?	840
Some dietary antioxidants that affect endogenous antioxidant systems	841
Antioxidants to fight diseases	843
Conclusion	845
References.....	846

CHAPTER 6.3 Antioxidants effects in health: Concluding remarks and future perspectives851

Ana Sanches Silva, Seyed Mohammad Nabavi

Introduction.....	851
Antioxidants versus ROS dichotomy	851

Effectiveness of antioxidants	854
Dietary sources of antioxidants	855
Future perspectives	856
Acknowledgment.....	857
References	857
Index	859
